1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 through 7 and 11 through 13, drawn to a module system for accessing small items, classified in class 221, subclass 124.
 - II. Claims 8 through 10, drawn to a process for accessing small items, classified in class 221, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
